PowerHealth's OnDemand Clinical Operations Performance Analytics provides the fast track to optimizing clinical operations by enabling healthcare organizations the operational visibility required to control costs, optimize resource utilization, and improve quality of clinical services delivery. The solution delivers *on demand* monitoring, sophisticated reporting and analysis of hospital operations through an intuitive and interactive platform that can be implemented in days - not months or years. PowerHealth OnDemand is your answer for visualizing your enterprise performance and achieving goals in less time, with absolute control.

Beyond reporting, OnDemand's Guided Intelligence™ provides organized answers you need for true performance improvement

PowerHealth OnDemand®'s unique Guided Intelligence™ effectively streamlines data and information processes for executives, management and analysts that will help turn this data into actionable intelligence throughout your enterprise. Guided Intelligence™ utilizes predictive analytics to aggregate data from disparate sources and then provides answers you need to achieve breakthrough performance throughout your operations.

An integrated analytics platform is included and works seamlessly with existing technology investments from transactional systems to deliver an integrated view of your operations with on demand access anytime, and from anywhere.

With OnDemand Clinical Operations Performance Analytics, you gain:

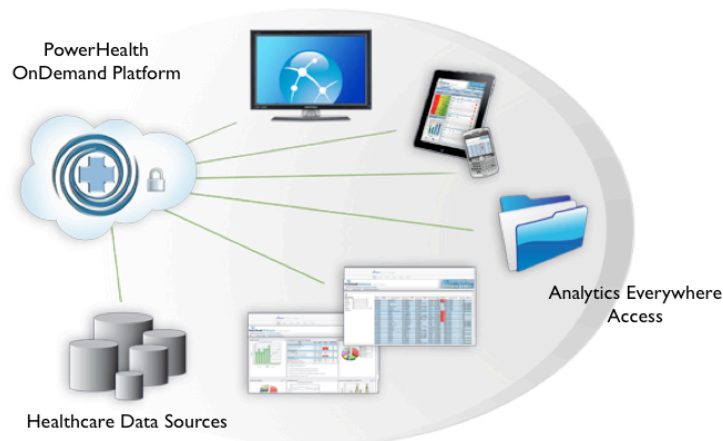

- Enterprise analytics and reporting to optimize operations and improve efficiency. Create a single view of operational performance by bringing together data from source transactional systems into an integrated and *on demand* platform.
- Real-time visualization and notifications on Patient census, service line, and bed management from door to discharge
- Established tracking of statutory reporting and key performance indicators (KPIs) aligned to operational metrics and goals.
- Ability to control costs through managing human and capital resources more efficiently by optimizing referrals and scheduling. Monitor and optimize room and bed utilization rates.
- User self-service reporting and access to significantly reduce costs and IT overhead
- Ability to optimize clinical and operational services through analyzing and streamlining delivery processes

OnDemand Clinical Operations Performance Analytics *Solve Matrix™*

Statistics	Service Line	Costs	Revenue/Billing	Profitability
Volumes	Profit/Loss	by DRG	by Net Patient Revenue	by DRG
Admissions	Contribution Margin	by Service Line	by Operating Revenue	by Service Line
Discharges	Cost	by Department	by DRG	by Department
Cases	Revenues	by Case	by Service Line	by Case
Average Daily Census	Net Patient Revenue	by Physician	by Department	by Physician
Occupancy Rate	Revenue per Case	by Physician Group	by Case	by Physician Group
Revenues	Indirect Expenses	by Speciality	by Physician	by Operating Revenue
Case Mix	Expenses/case	by Status	by Physician Group	Total Margin
